Art Unit: 1754

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 3, 5, 7-12, 14, and 16-25 drawn to a method for selectively removing carbon monoxide, a reactor and a catalyst, classified in class 423, subclass 247.
 - II. Claims 4, 6, 13, and 15, drawn to a method for selectively removing carbon monoxide, a reactor and a catalyst, classified in class 423, subclass 247.
 - III. Claim 26, drawn to a catalyst, classified in class 502, subclass 304.
 - IV. Claim 27, drawn to a catalyst, classified in class 502, subclass 304.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation since both methods, reactors and catalyst are different due to the different composition of the catalysts.
- 3. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation since they have different composition of the catalysts.
- 4. Inventions I and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different

Art Unit: 1754

functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation since they have different composition of the catalysts.

- 5. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation since they have different composition of the catalysts.
- 6. Inventions II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation since they have different composition of the catalysts.
- 7. Inventions II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation since they have different composition of the catalysts.
- 8. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II; the search required for Group I is not required for Group III; the search required for Group IV; the search required for Group II is not required for Group III; the search required for Group II is not required for Group IV; the

Page 3

Art Unit: 1754

search required for Group III is not required for Group IV; restriction for examination purposes as indicated is proper.

9. Claims 3, 5 and 14 are generic to a plurality of disclosed patentably distinct species comprising for:

N = Pt, Pd, and Au

A, A', A" = Zr, Gd, La, Sc, Sr, Co, Cr, Fe, Mn, V, Ti. Cu, and Ni.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (For each on of N, A, A', and A"), in the event applicants elect Group I. even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

10. Claims 4, 6 and 15 are generic to a plurality of disclosed patentably distinct species comprising for:

N = Pt, Pd, and Au

M = Zr, Co, Cr, Fe, Mn, V, Ti. Cu, and Ni.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (<u>For each on of N and M</u>), in the event applicants elect Group II. even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

Art Unit: 1754

Control Number: 10/039,7

be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Page 5

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission

may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

11. Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37 CFR

1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR

1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

12. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Maribel Medina whose telephone number is (703) 305-1928.

The examiner can normally be reached on Monday through Friday from 7:30 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Stanley Silverman can be reached on (703) 308-3837. The fax phone number for the

organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 308-0661.
